    Example: **C:¥Sinwa¥Unidraf7¥**

8. Start Unidraf7 and check the "Version" and "Revision" in the **[Help] - [About Unidraf]**.

How to Update Using Unidraf7 Installer

> **This is a procedure for using Unidraf7 installer. Various sample data and configuration files are included in Unidraf7 installer. Therefore, if PC with Unidraf7 is updated by this, the data file and configuration file of the same name may be overwritten. For that reason, about usual update, we recommend you [How to Update Only Program Files for Unidraf7](P.1).**

1. Open the following homepage for Unidraf.

   https://sinwa.co.jp/support_en/

2. Click the **[Unidraf7]** in the **[Unidraf PROGRAM SUPPORT]**.

   ## Unidraf PROGRAM SUPPORT

   · Unidraf7
   · Unidraf2010 Expert / Expert LT
   · Unidraf5
   · Unidraf Ver. 4.0

3. Enter **"ID"** and the **"Password"** for support and click the **[login]** button.

   ID: [   ]
   Password: [   ] ☐ Save the password
   [login]

4. Click the **[Program Download]** in the **[Unidraf7 Online Support]**.

   ## Unidraf7 Online Support

   ▶ The Supported Newest Functions
   ▶ The Newest Bug Fix Information
   ▶ Program Download

5. Click the **[Download]** in the **[Unidraf7 Installer]**.

Unidraf7 Installer		
Update	Version	Revision
Sep.01.2022	2.0	216

* Keep in mind that the update program with an installer includes various data, various configuration files, etc.

* Extract the downloaded compressed file, double-click the "AutoRun.exe", and start installation.
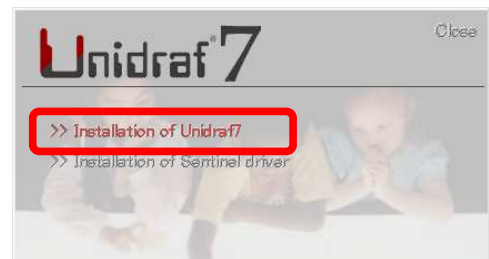

* In reinstallation, because three choices (Modify / Repair / Remove) are displayed, select the "Repair."

* By upgrade of installer software, even if it selects "Repair", it may be unable to update normally. In that case, please select and try the "Modify."
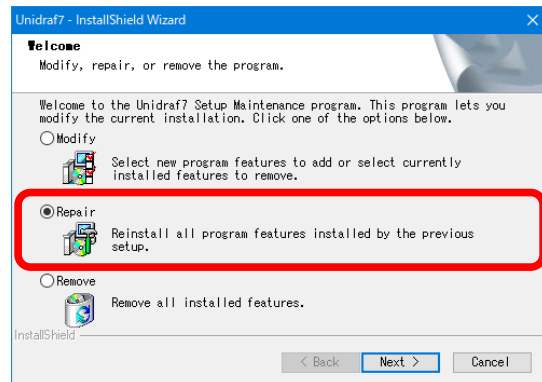

Download

Unidraf7e.zip (50,680KB)

6. Extract the downloaded file.

7. Check that Unidraf7 has closed and double-click the **"AutoRun.exe"** in the "Unidraf7" folder.

8. Click the **[Installation of Unidraf7]** and install according to the directions in a screen.

   Default: C:¥Sinwa¥Unidraf7¥

Unidraf 7   Close

>> Installation of Unidraf7
>> Installation of Sentinel driver

Cautions!!

✓ **In reinstallation, choose the [Repair] in three choices.**

✓ **By having upgraded the "installer software" in August, 2013, although you choose the [Repair] when reinstalling the newest Unidraf, it may not be updated. In such a case, choose the [Modify].**
However, once you update by the [Modify], in next reinstallation, the [Modify] will not work any longer. Please keep in mind that the usual [Repair] must be chosen.

---

9. Start Unidraf7 and check the "Version" and "Revision" in the **[Help] - [About Unidraf]**.

About Unidraf   ×

Unidraf7 Version 2.0 Revision 216   OK
